

This is the meet me point for a site. EA needs to place a HH somewhere.

Get the boxes that hidden measurements/stations.

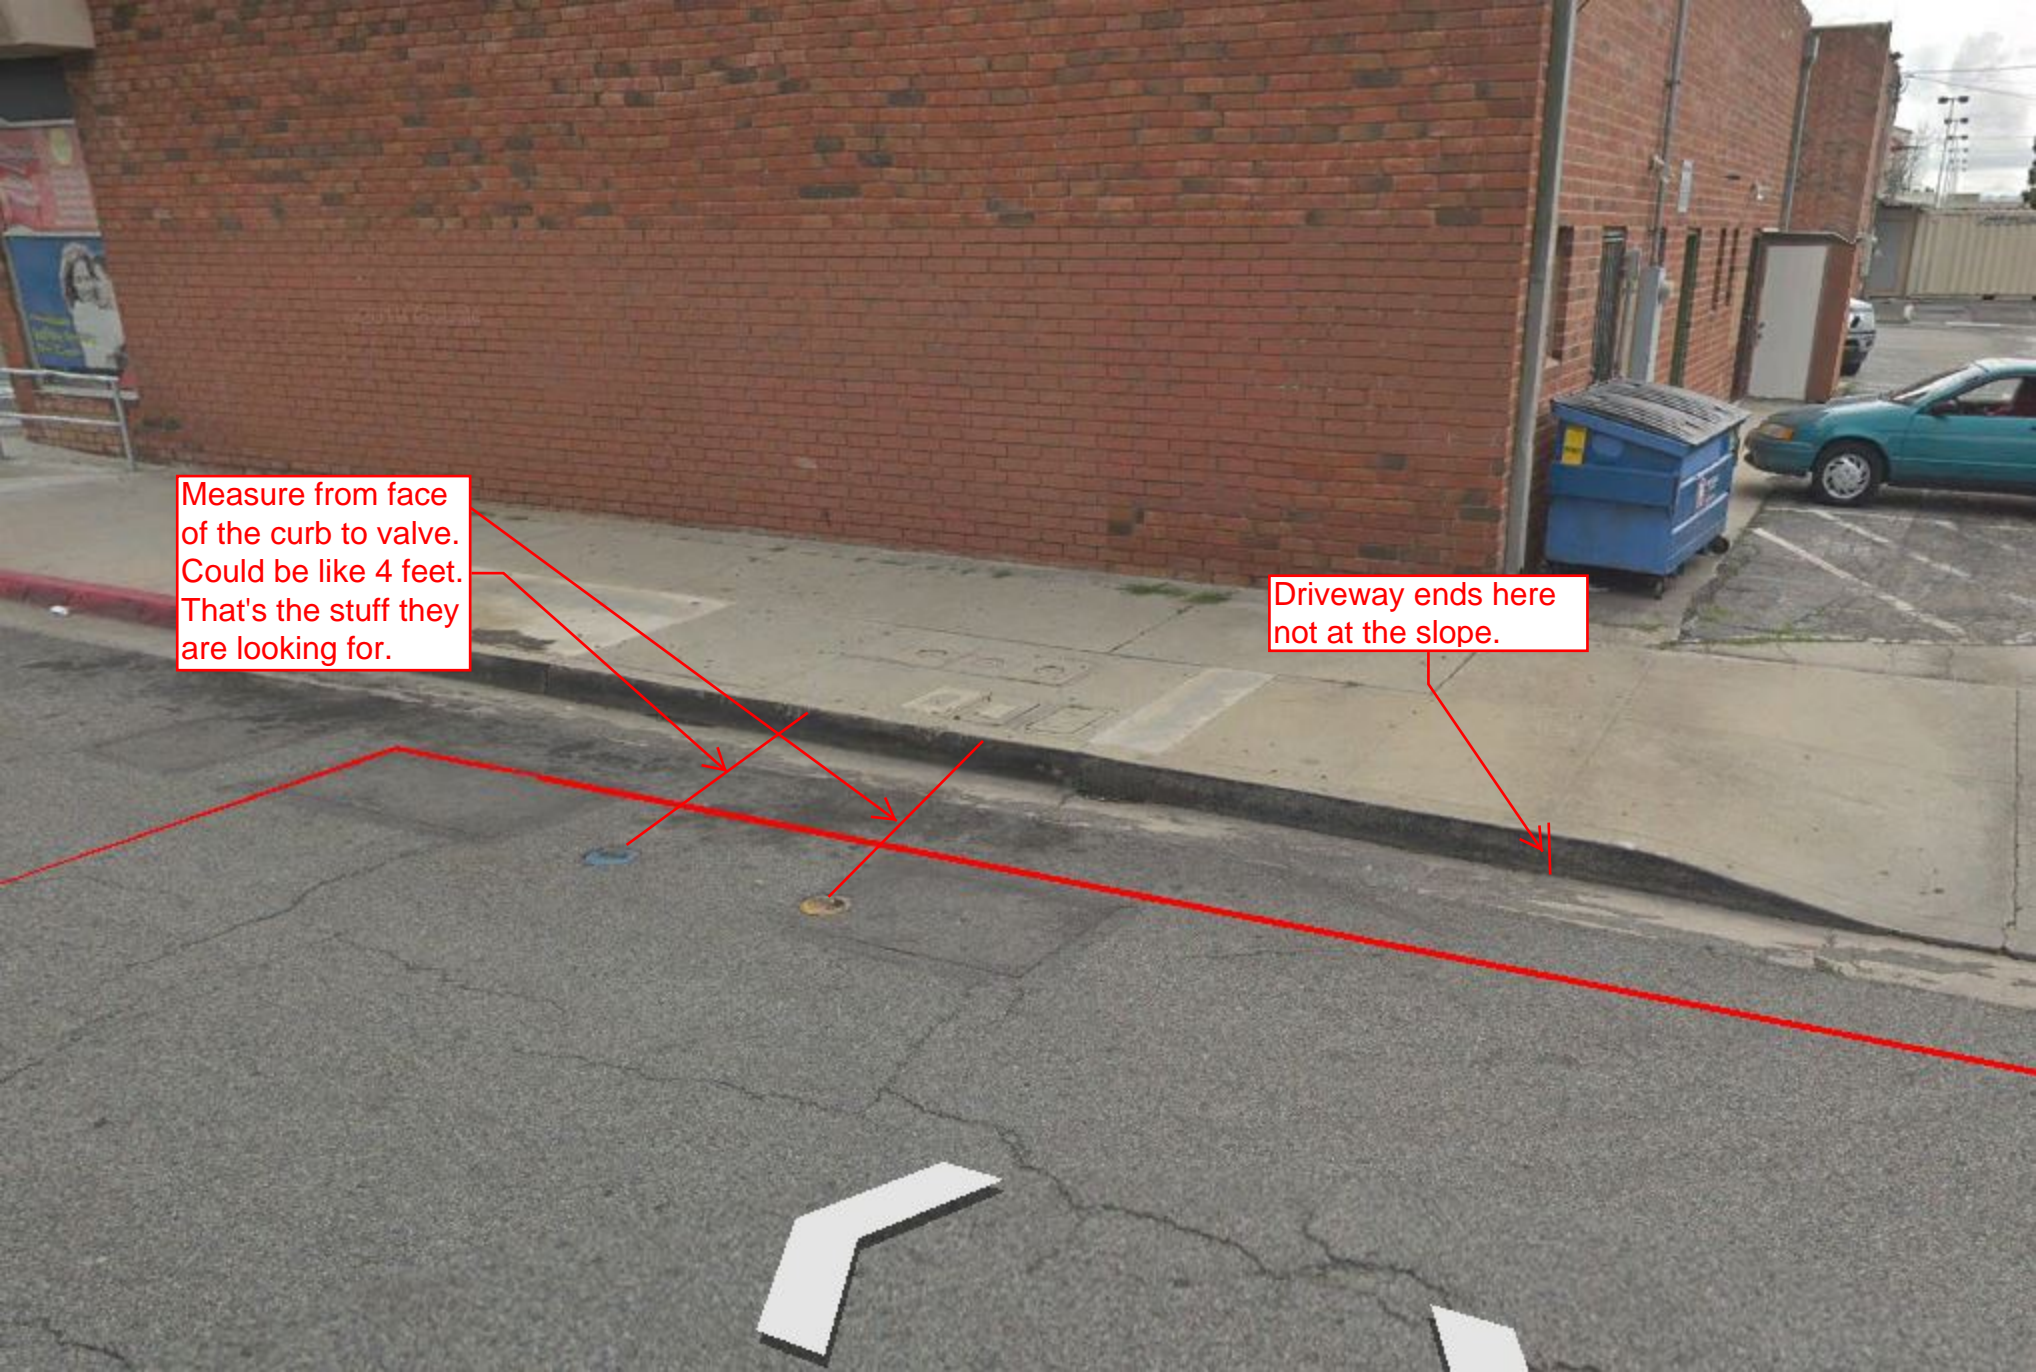

Measurements of the Parkway and tree stationing.

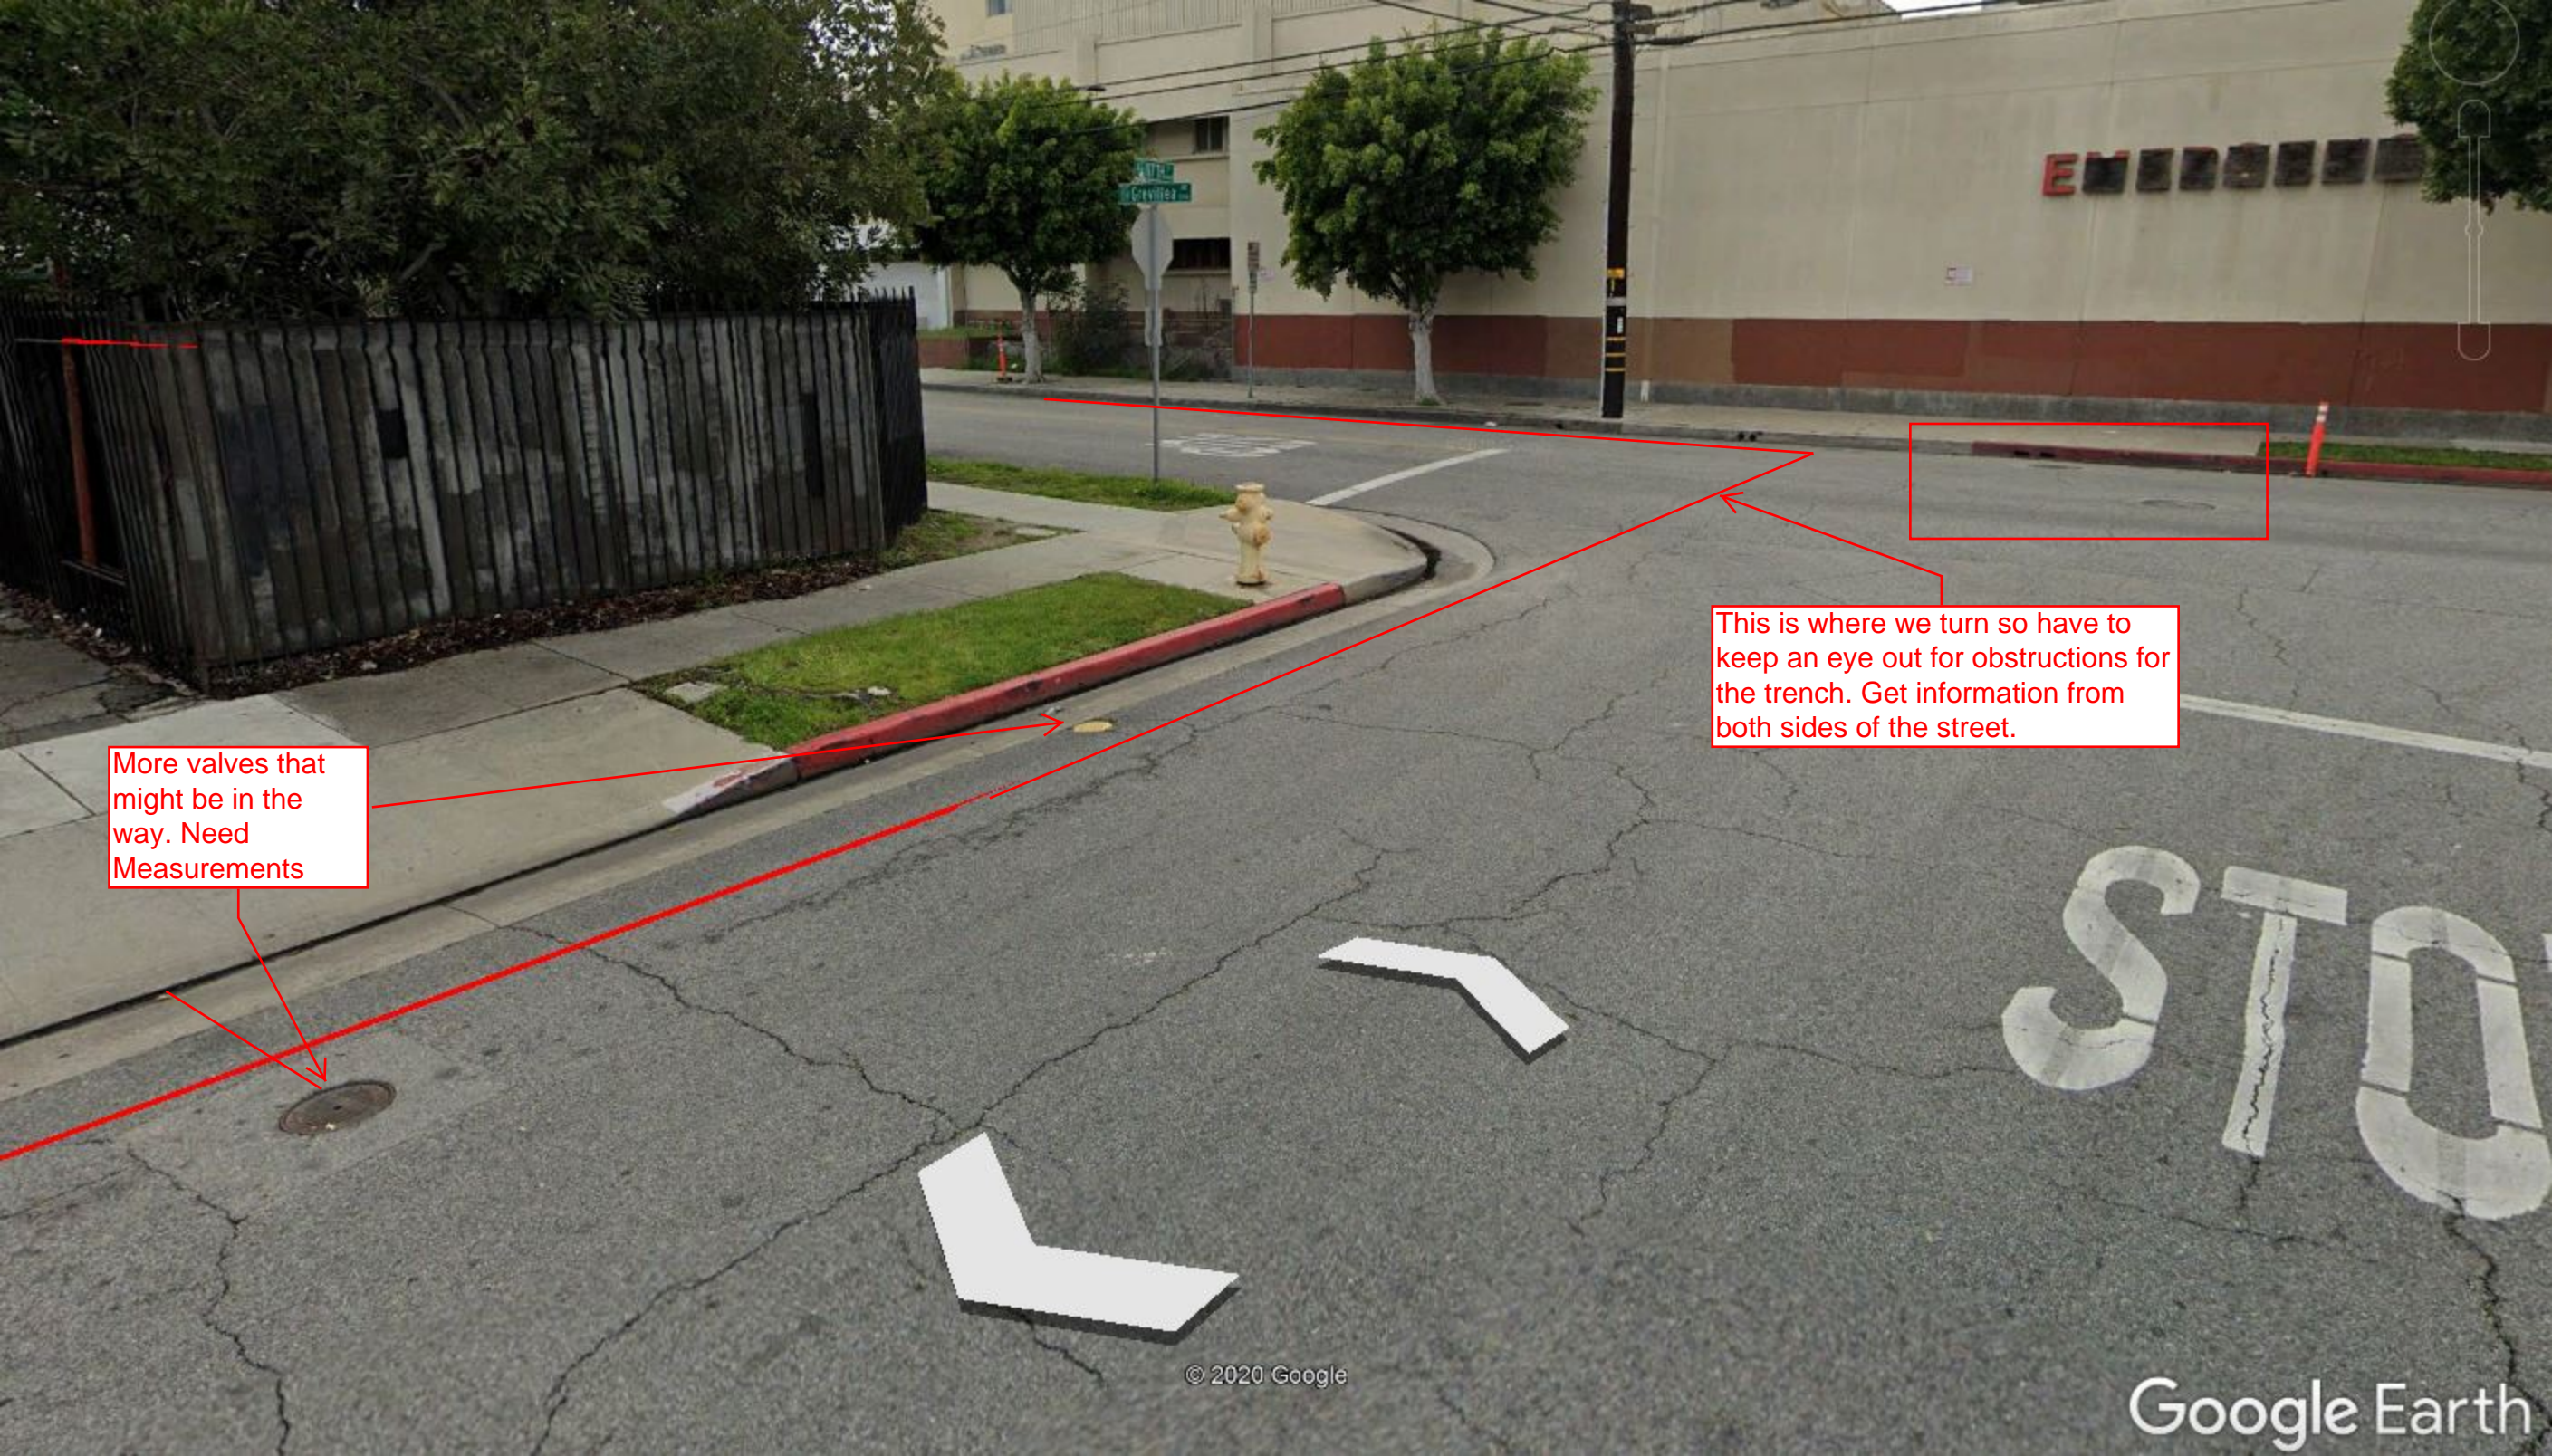

Sidewalk measurements

Measure from face of the curb to valve. Could be like 4 feet. That's the stuff they are looking for.

Driveway ends here not at the slope.

More valves that might be in the way. Need Measurements

This is where we turn so have to keep an eye out for obstructions for the trench. Get information from both sides of the street.

Get UG info back here.

Proposed riser pole

I see a lot of valves and MH by the cross walk.

Riser pole

Need measurements of sidewalk this would be an ideal HH placement by riser pole. As longest there is space.
